Jules Porchey - The Computer Man

Spring 2004, Volume 1

Contact Information:

E-mail: thecomputerman8@yahoo.com

Web Site: www.thecomputerman.biz

I have added a page to my web site at www.thecomputerman.biz where you can find all of my past and present newsletters so you can refer to them at any time you wish, or tell your friends about them too....

* Notice: For my clients who still have my old e-mail address in your address book (julesp@gte.net)

Please change my address to thecomputerman8@yahoo.com . I am closing my Verizon internet account since I have switched to Comcast cable internet and you will no longer be able to contact me at the old address. Thank you....

Welcome to the Early Spring edition of my Tips Newsletter.

I hope you find something in it that interests you. I try to provide informative, interesting, and some fun things for you to explore. I should mention that I check out all web sites I mention and believe they are functioning at the time I created this news letter. Perhaps at a later time when you try them they may be out of service or no longer available on the web. Enjoy.... Jules

I have had some comments that some have had problems when they try to print out my newsletters from the e-mail or the web site. I have to admit I did not allow for this in my first ones, however I am trying to create them in a narrower format so they will print properly.

If this is still a problem for you perhaps you can use this tip:

Go to my web site at www.thecomputerman.biz. Click on the link to More Pages. Then click on the Newsletters Link. Click on the link to the newsletter you want to view and print. In the Internet Explorer menu at the top of the page click on File. Click on Print Preview. If the page looks like it is all fitting on the page width then you can safely print it. If it is not fitting on the width of the page in the preview window....you need to adjust the page margins.

To adjust the page margins, Click on "Close" to exit the print preview screen. Once again click on File and then click on Page Setup. In the window that pops up, change the left and right margins each to "0" (zero) and the top and bottom margins to .25 each. Now go back and try the Print Preview and see if all the page is showing. If so, then it is safe to print.

This tip is useful to try before printing any web page. By the way, this setting should remain like that when you return to Internet Explorer, so you should not have to re-set it again. Hope this helps....
